

Jeff,

Just wondering when you will be having your next litter. I'd like to get another pup after the season is over. Sage is doing excellent by the way. Everyone that has seen her run has been very impressed with her.

I hunted with a group of guys opening weekend that all had GSP's. By the end of the weekend I had 3 of the 4 guys tell me they would have a setter for their next dog. Not only that but one guy offered me \$2,000 for Sage. I just laughed at him! The guy that I referred to you was K.N. Talk to you after rifle season.

Shawn

I am really satisfied with my female pup from Morris Gundogs. She's real birdy and does everything I bought her for.

Jeff Morris, I got a dog from you about 4 years ago and I want another one! She has the best disposition and my family just loves her.

Sugar is great, my wife, our kids, and I just love her so much. She is pointing and retrieving to hand at only 8 months.

Hello from Wichita,

Just wanted to brag on my dog that I have from you as Kady & I have just enjoyed another great hunting season--more enjoyable as the bird populations are improved.

A great "brag" story is the last quail she pointed yesterday to end the 2004 season: She pointed a single in somewhat thin pasture shortly after a young shorthair had just pointed one nearby and we had already flushed & shot.

As she held her point the shorthair ran in on her while the master was yelling whoa--which the dog did not mind--the dog ran directly in front of Kady twice (why the quail did not flush?) and Kady held her point. The shorthair smelled around and left which looked like a false point by Kady--then the quail flushed--which I shot and she retrieved. Then just to show off, the shorthair went on point & Kady backed her, I was very proud.

While I did not find many quail this year, I did get in on some good pheasant hunts at Garden City area. Kady has been handling her pheasants pointing & not flushing wild as well as retrieving well this year. I hope to get her in on some good quail hunting next year. A couple of days where she finds quail all day will be great for her.

She is close range which can be limiting at times. She has solid pointing & retrieving skills & she does not require handling while moving up on pheasants as many dogs need a lot of direction told to them - which I think spooks birds.

Hope your season was a good one,
T. McCullough
